

Mariswe (Pty) Ltd is a South African-infrastructure advisory company offering civil engineering services in the areas of water, transportation, structural engineering. We specialize in infrastructure planning and project management focussing on a complete life-cycle management offering for strategic projects.

The company has built a proud tradition of excellence in providing engineering solutions with integrity across sub-Saharan Africa over the past 51 years, we have extended our reach and exposure into West Africa where we continue to deliver infrastructure that improves lives.

Mariswe is committed to providing consistent, high-quality services to our clients and we have continuously held ISO 9001 certification for our quality management system since 2007.

Our solutions-based culture has led us to broaden our client base, offering a leading role throughout project life-cycles from capital development through operation, maintenance and closure of projects.

This approach harnesses the multi-disciplinary skills of our teams in South Africa and across the African continent to offer innovative and diverse project packages under a single umbrella.

Mariswe is 100% employee owned with 45.34% direct shareholding, 32.65% by the Mariswe Black Employee Trust (MBET), and 22.01% held by the Mariswe Share Trust.

The company has approx. 140 employees operating across four regions in South Africa: Gauteng, KwaZulu-Natal, Eastern Cape and Western Cape, each lead by the respective Divisional Head. Executive managers in each region are responsible for projects and profitability in key service delivery areas. Cross-border projects are lead by senior executives with decision-making capabilities.

Infrastructure Advisors are senior executives with vast experience in civil engineering who use that experience to engage and provide support to our clients and employees. They are available to advise clients on broad range of infrastructure issues including infrastructure planning, maintenance and funding options.

throughout Africa

Mariswe operates companies and subsidiaries in Ghana, Tanzania, Zambia, eSwatini, and Lesotho. In addition to significant assignments in these countries the company has completed, or is working on projects in Botswana, Burkina Faso, Democratic Republic of Congo, Kenya, Liberia, Madagascar, Mozambique, Namibia, Rwanda, Sierra Leone, Uganda, Zimbabwe, Mauritius and Eswatini.

CLIENT SERVICES

Transportation

Mariswe is a leader in integrated transportation services throughout the infrastructure life cycle from concept and design to operation and maintenance. We employ qualified and experienced professionals who deliver quality engineering solutions incorporating the latest global technologies.

Water and Sanitation

Mariswe's comprehensive water engineering services span the abstraction, conveyance, storage and drainage of raw, potable, treated and waste water. We have substantial experience in large multidisciplinary water and wastewater treatment projects across Africa. Mariswe has undertaken several water resources planning studies, reconnaissance studies and water services master plans for the public sector as well as mining and other private clients.

Structures

Mariswe's structures portfolio includes all transportation and water related structures, as well as commercial, industrial, institutional and residential structures. We aim to create structural schemes suitable for purpose, sensibly economical, and not unduly sensitive to change. Uncomplicated structural solutions that are easy to build provide good benchmarks. Our focus on sustainable structures includes reducing carbon footprint through use of recycled materials.

Infrastructure Planning

Mariswe formulates strategic level multi-stakeholder plans for the development and life-cycle management of infrastructure. We offer socio economic consulting services including local, regional and sectoral economic development strategies, economic spatial frameworks and economic and social infrastructure audits.

Project Management

Our Project Management expertise covers infrastructure assignments from inception to construction closure including performance measurement. Programme Management includes managing multi-year infrastructure assignments for public and private sector clients.

Infrastructure Advisory

A core high-level team explores opportunities for Mariswe to combine management, planning, consulting and project-specific expertise in the provision of comprehensive project life-cycle solutions in diverse sectors. This includes agriculture, mining and telecommunications infrastructure where Mariswe already has strong project experience, as well as emerging sustainable markets. The Infrastructure Advisory Team focuses on the private sector, public private partnerships (PPPs), and institutional finance organisations such as World Bank.

Integrated Construction Unit (iCU) Contract Model

Mariswe's home-grown iCU contract, a risk management methodology suited to dynamic project environments, has been widely adopted with much success throughout southern Africa. The iCU methodology features as an element of Mariswe's unique service offering and is also used increasingly for projects in our traditional service areas.

"We engineer solutions which build communities because we are passionate about improving people's lives."
